

18.1.1 Citizen involvement in co-creation/co-design of NBS

Project Name: PHUSICOS (Grant Agreement no. 776681)

Author/s and affiliations: Gerardo Caroppi^{1,2}, Carlo Gerundo², Francesco Pugliese², Maurizio Giugni², Marialuce Stanganelli², Farrokh Nadim³, Amy Oen³

¹ Aalto University, Department of Built Environment, Espoo, Finland (gerardo.caroppi@aalto.fi)

² University of Naples Federico II (UNINA), Department of Civil, Architectural and Environmental Engineering, Naples, Italy

³ Norwegian Geotechnical Institute (NGI), Oslo, Norway

Openness of participatory processes: Citizens Involved	Participatory Planning and Governance
Description and justification	The amount of local actors in the Design Scenarios implementation should be taken into account in order to evaluate the quality of participation process. It should be assessed counting the number of citizen involved
Definition	The Indicator can be defined as the number of people involved in participatory process set up during the implementation of the Design Scenario. This Indicator will be equal to 0 in the Baseline Scenario and will be assessed in the Design Scenario computing the number of people taking part to the participatory process.
Strengths and weaknesses	It could be difficult to estimate the exact number of people involved.
Measurement procedure and tool	At the beginning of the meetings organized during the participatory process, citizens should be invited to sign a timesheet. The Indicator will be equal to the whole number of people involved during these meetings. Other proxy data could be used, such as number of visits to the website of the participatory process.
Scale of measurement	No.
Data source	Participatory Process Planning Committee
Required data	Time-sheet
Data input type	Quantitative
Data collection frequency	
Level of expertise required	Low
Synergies with other indicators	

Connection with SDGs	17
Opportunities for participatory data collection	This Indicator could only be calculated through a participatory data collection.
Additional information
