Renewable energy produced		New Economic Opportunities and Green Jobs
<b>Description and justification</b>	This indicator will evaluate the benefit obtained in terms of production of new energy on the NBS.	
<b>Definition</b>	Some of the NBS in proGIreg entail the installation of solar panels and other renewable energy producing installations. Therefore, the amount of energy produced (and therefore not demanded from the grid) will be accounted for.	
<b>Strengths and weaknesses</b>		
<b>Measurement procedure and tool</b>	This data will be collected via the economic and labour questionnaire to be distributed to the entities in charge of the management of those NBS where energy production installations will be installed.	
<b>Scale of measurement</b>	At NBS level.	

<b>Data source</b>	
<b>Required data</b>	Entities administrating NBS.
<b>Data input type</b>	
<b>Data collection frequency</b>	Once after implementation.
<b>Level of expertise required</b>	The person in charge of administrating the NBS should be able to respond.
<b>Synergies with other indicators</b>	Connected to other economic and labour indicators and environmental indicators looking at energy savings.
<b>Connection with SDGs</b>	Goal 7: Affordable and clean energy Goal 8: Decent work and economic growth
<b>Opportunities for participatory data collection</b>	None
