6.15 Potential population exposed to risks

6.15.1 Inhabitants

Project Name: PHUSICOS (Grant Agreement no. 776681)

Author/s and affiliations: Gerardo Caroppi^{1,2}, Carlo Gerundo², Francesco Pugliese², Maurizio Giugni², Marialuce Stanganelli², Farrokh Nadim³, Amy Oen³

¹ Aalto University, Department of Built Environment, Espoo, Finland (gerardo.caroppi@aalto.fi)

² University of Naples Federico II (UNINA), Department of Civil, Architectural and Environmental Engineering, Naples, Italy

³ Norwegian Geotechnical Institute (NGI), Oslo, Norway

Inhabitants	Natural and Climate Hazards
Description and justification	Indicators of Potential Population Exposed to Risks sub-criterion will assess the potential population exposed to risk.
Definition	Number of people that inhabits a place, especially as permanent residents.
Strengths and weaknesses	

Measurement procedure and tool	Estimation from statistical data.
Scale of measurement	nr/ha
Data source	
Required data	Model/Statistical Data
Data input type	Quantitative
Data collection frequency	
Level of expertise required	Low
Synergies with other indicators	
Connection with SDGs	3
Opportunities for participatory data collection

6.15.2 Area and population exposed to flooding

Project Name: URBAN GreenUP (Grant Agreement no. 730426)

Author/s and affiliations: Raúl Sánchez, Jose Feroso, Silvia Gómez, María González, Jose María Sanz, Esther San José

CARTIF Foundation. Parque Tecnológico de Boecillo, 205, 47151, Boecillo, Valladolid, Spain

Area (Ha) and population (number of inhabitants) exposed to flood risk	Natural and Climate Hazards
Description and justification	<p>The areas and population exposed to flooding will be compared before and after the installation of the NBS to know if the intervention has influence in mitigating effects from flood risks.</p> <p>Flood hazard maps cover the geographical areas which could be flooded according different scenarios in terms of the return period. For each scenario studied the following</p>
