Buildings	Natural and Climate Hazards
Description and justification	Indicators of Potential Infrastructures Vulnerable to Risks sub-criterion will assess the potential infrastructures and buildings vulnerable to risks.
Definition	Vulnerability of housing, industrial buildings and strategic buildings. For instance, a wooden house is sometimes less likely to collapse in an earthquake, but it may be more vulnerable in the event of a fire or a hurricane.
Strengths and weaknesses	
Measurement procedure and tool	Estimation from statistical data.
Scale of measurement	nr/km ²
Data source	
Required data	Model/Statistical Data/GIS
Data input type	Quantitative
Data collection frequency	
Level of expertise required	High
Synergies with other indicators	
Connection with SDGs	11
Opportunities for participatory data collection	
Additional information
